Tabeeda Shakir

Senior Software QA Engineer | Test Automation (Playwright, Java, RestAssured)
Limassol, Cyprus | +90 548 8469399 | tabeeda1@gmail.com | linkedin.com/in/tabeeda-shakirshah101010
Open to remote, hybrid, and on-site roles | Open to relocation: EU and GCC

SUMMARY

Senior Software QA Engineer with 5+ years of experience owning quality from test strategy to release sign-off across SaaS, travel, logistics, e-commerce, and fintech products, including as the sole QA engineer at a startup. Builds UI automation with Playwright and API automation with RestAssured (Java), TestNG, and Postman/Newman in GitHub Actions and Jenkins CI. Currently leads QA for three products at a Dubai-based company, where 300+ automated tests cut full regression from 2-3 days to under a day.

TECHNICAL SKILLS

Test Automation: Playwright (JavaScript), RestAssured (Java), TestNG, JUnit, Postman, Newman, Gherkin (BDD)
Programming & Data: Java, JavaScript, SQL
CI/CD & Tools: GitHub Actions, Jenkins, Git, TestRail, Jira, Confluence, Figma
Performance & Security: JMeter, OWASP ZAP, Chrome DevTools
Testing: API, Web, Mobile (iOS, Android), Regression, Functional, Integration, End-to-End, Smoke, Sanity, Exploratory, Cross-Browser, Responsive, Database
Practices: Test Strategy & Planning, Agile/Scrum, Shift-Left Testing, Release Readiness (Go/No-Go), Defect Triage & Root Cause Analysis
Currently Learning: Python for test automation, Selenium WebDriver

WORK EXPERIENCE

Senior QA Engineer | Epicmetry | Dubai, UAE (Remote)
Jun 2025 - Present
QA lead for three SaaS products (Tawla.ae, Modon Express, and Alrais Travel) across web, mobile, and API, working in Agile teams.

- Own test strategy and planning across all three products, turning requirements into test scenarios for web, mobile, and API workflows.
- Automate regression with 300+ tests across Playwright (UI), RestAssured (API), and Postman/Newman collections running in GitHub Actions CI, cutting full regression from 2-3 days to under a day.
- Design and execute 700+ functional, API, and UI test cases across e-commerce, logistics, and travel platforms, tracking execution and results in TestRail.
- Lead bug triage and release readiness, giving go/no-go input on 3+ releases a month and working with developers and product managers to prioritize fixes.
- Run performance tests with JMeter and security scans with OWASP ZAP ahead of releases to protect platform stability.

Quality Assurance Engineer | Propellus.co | Pakistan (Hybrid)
Jun 2024 - May 2025
Early-stage startup automating visa processing for travel agents and online travel agencies (OTAs).

- Sole QA engineer, owning testing from planning to release and maintaining 500+ test cases across web and mobile visa workflows.
- Automated critical backend API tests with RestAssured (Java) and TestNG, cutting manual regression effort by about 50% across sprints.
- Built the initial Playwright (JavaScript) UI automation suite and introduced shift-left testing to catch defects earlier in each sprint.
- Validated data integrity across visa workflow transactions with SQL queries.
- Found critical UI/UX issues through cross-browser and responsive exploratory testing; used Chrome DevTools to diagnose slow page loads and JMeter to load-test the APIs behind high-traffic flows.

Software Quality Assurance Specialist | Maleyat Group | UAE (Remote)

Jan 2024 - Jun 2024

Forex and gold trading company providing investment and trading services.

- Led regression and backend validation testing across CRM/CMS trading platforms with 120+ test cases, identifying MetaTrader 5 (MT5) issues before production releases.
- Wrote and maintained 350+ functional and BDD (Gherkin) scenarios covering dashboards, onboarding flows, and trading logic, reducing QA rework and improving release readiness.
- Worked with UI/UX teams to align interface consistency across 3 modules, reducing user-reported layout issues.

Software Quality Assurance Engineer | Dastgyr | Karachi, Pakistan (Hybrid)

Dec 2021 - Jan 2024

B2B e-commerce marketplace connecting retailers with suppliers through technology and supply-chain solutions.

- Owned QA for a high-transaction B2B marketplace across retailer, seller, and warehouse-picker apps, and led QA for 3 logistics apps covering pickup, transit, and delivery confirmation.
- Designed and executed 800+ validation scenarios across iOS, Android, and web applications before release.
- Automated API tests with RestAssured (Java) and ran JMeter load tests to validate backend performance.
- Integrated automated tests into Jenkins pipelines for nightly regression builds, cutting manual verification effort by about 50% per sprint.
- Tracked test cases and results in TestRail and used SQL to validate backend data integrity across seller, retailer, and logistics modules.

SQA & UI/UX Designer | Squarera (A DataPillar Company) | Karachi, Pakistan

Jan 2021 - Sep 2021

- Owned QA for 2 SaaS MVP launches, finding critical pre-release bugs and stabilizing releases across sprints.
- Wrote and executed 50+ UI test cases and worked with UI/UX designers on 3 key modules, reducing layout bugs.

EDUCATION

Bachelor of Computer Science | PAF-Karachi Institute of Economics and Technology (PAF-KIET) | Karachi, Pakistan

Jan 2018 - Jun 2022

- Final year project: Wasty (Smart Waste Collection System), an Android app built with Java, Firebase, and Google Maps API.
